

BodyOS AI

AI-Powered Fitness Platform

Product Requirements Document (PRD)

2026

1. Product Vision

BodyOS AI is an intelligent fitness platform combining nutrition, training, and AI to deliver adaptive personalized plans.

2. Problem

Users struggle with consistency due to generic apps, lack of personalization, and no daily engagement.

3. Solution

An AI-powered system that generates and continuously adapts fitness and nutrition plans.

4. Target Audience

Primary: Individuals aged 18–45. Secondary: Coaches and professionals.

5. Core Features

- AI-generated diet and workout - Daily report with feedback - Today dashboard - Progress tracking

6. Extended Features

- Workout videos - Macro tracking - Diet adjustments - Multi-language support

7. Future Features

- Photo-based analysis - Automatic adaptation - Behavioral insights

8. Tech Stack

Node.js, React, React Native, PostgreSQL, OpenAI

9. Business Model

Freemium with premium subscription (\$10–25/month)

10. KPIs

Retention, engagement, conversion, adherence

11. Roadmap

MVP → Expansion → AI automation → Global scale

12. Conclusion

BodyOS AI is a scalable AI-driven fitness platform focused on personalization and retention.
